## 1.0 What are Progress Views?

Progress Views are a way to show a framework of proficiencies/competencies/standards and how a student is progressing against these in a visual format. Form responses can "map" or link to the framework when completing a form or after the form has been submitted.

## 2.0 What forms can be mapped to the framework?

- Practice Supervisor Feedback on Student's Performance
- Record of Complementary Placement Experience
- Record of Meeting
- Initial Meeting
- Practice Assessor Review 1 - Student Reflection
- Practice Assessor Review 1
- Student Reflection following Practice Assessor Review 1
- Practice Assessor Review 2 - Student Reflection
- Practice Assessor Review 2
- Student Reflection following Practice Assessor Review 2
- Summative Holistic Assessment - Student Reflection
- Summative Holistic Assessment
- Student Reflection following Summative Holistic Assessment
- Summary of Progress
- Practice Episode Records
- Woman receiving care and/or their family feedback
- Breastfeeding assessment tool
- Reflective Journal/notes/additional evidence

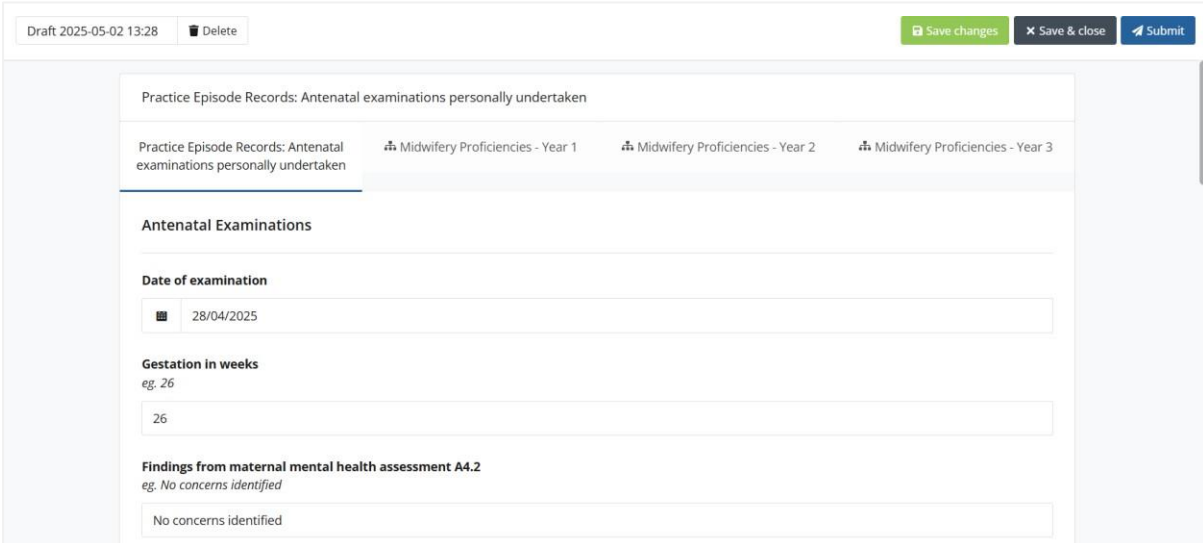

If student's are needing to get proficiencies signed off that relate to **discussions** or **demonstrations**, then these proficiencies can be signed off by either the student's Practice Assessor or Supervisor working with you to log the discussions or demonstrations within forms like the Record of Meeting, Practice Supervisor Feedback of Student Performance and mapping to the relevant proficiencies within the framework. Alternatively, the student's Practice Assessor or Supervisor can log into their own account, go to the student's progress view wheel, where they can add comments around the discussions or demonstrations that happened against the relevant proficiencies before they then grade the proficiency/s. These comments will act as the evidence in place of a physical form like the ones listed above.

### 3.0 Mapping form responses to the framework

#### 3.1 Mapping during a form submission

Locate the required form within the student's ePortfolio and complete the form. An example is shown below.

Not all forms can be mapped to the framework (see section 2.0 above for which forms can be mapped). When selecting a form to complete, forms that can be mapped towards the framework will show additional tabs of the frameworks available like the example screenshotted below. Please ensure the correct framework, relevant to your year of study, is selected.

Draft 2025-05-02 13:28 Delete Save changes Save & close Submit

Practice Episode Records: Antenatal examinations personally undertaken

Practice Episode Records: Antenatal examinations personally undertaken Midwifery Proficiencies - Year 1 Midwifery Proficiencies - Year 2 Midwifery Proficiencies - Year 3

#### Antenatal Examinations

**Date of examination**

**Gestation in weeks**  
eg. 26

**Findings from maternal mental health assessment A4.2**  
eg. No concerns identified

Next, you will be able to map this response against the framework.

The form does not need to be mapped towards proficiencies straight away. If the student or Practice Assessor/Supervisor are busy or needing to consult further, they can submit the form and complete the mapping later.

***Please see section 2.1 for more information.***

To map this response against proficiencies at the point of completing a form, click the relevant years framework tab at the top of the page.

**CHOOSE COMPETENCIES**

▼ Antenatal proficiencies for midwives

▼ Continuity of Care and Carer

☐ A1.1 discussing with women, and their partners and families as appropriate, information on the available options for the place of birth, supporting the woman in her decision; and regularly reviewing this with the woman and with colleagues

☐ A1.2 ensuring safe continuity of care by identifying and communicating effectively with colleagues from the appropriate health and social care settings or agencies

☐ A1.3 promptly arranging for the effective transfer of care for the woman, when there are changes in care needs

▼ Relationship Building

☐ A2.1 providing evidence-based information on all aspects of health and well-being of the woman and newborn infant to enable informed decision-making by the woman, and partner

**SELECTED COMPETENCIES**

No competencies selected

**Note:** If a student has come to the end of a year and their progress view wheel has been marked as complete, those proficiencies within that tab will not be able to be selected. A red warning message will show stating 'This framework has been marked as complete. No further changes can be made.'

Once the proficiencies have been selected, they will appear on the right hand side. Review the selected proficiencies to ensure that you are happy.

**SELECTED COMPETENCIES**

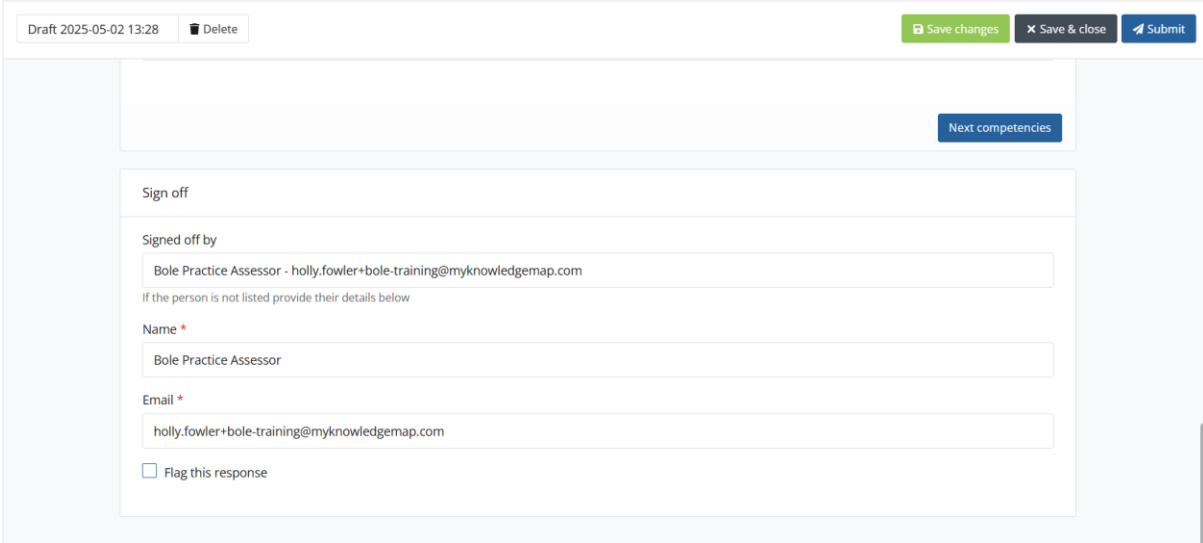

☒ A1.2 ensuring safe continuity of care by identifying and communicating effectively with colleagues from the appropriate health and social care settings or agencies

☒ A3.4 identifying when any alternative communication techniques are required, making adjustments to facilitate use of personal communication aids or access to services such as translation and interpretation

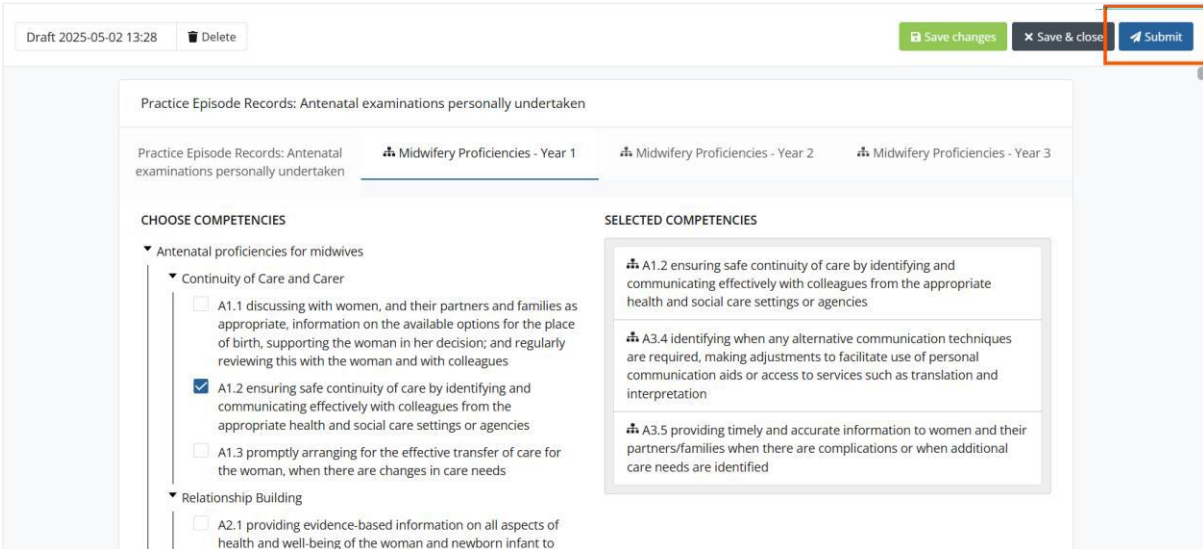

☒ A3.5 providing timely and accurate information to women and their partners/families when there are complications or when additional care needs are identified

Once completed, the form will need signing off by a Practice Staff member who is able to validate your work.

To sign off the form, the Practice Staff will type in their full name and work email address as shown below.

The form can now be submitted. Click **Submit**.

Once submitted, you will no longer be able to make changes to the form.

Click **OK** to proceed.

3.2 Mapping after a form submission

Once a form has been submitted, you are still able to map or unmap the form towards the framework.

To do this, select the form to view the responses.

3 Timesheet

You will see a confirmation dialog box appear in the bottom right-hand corner after every change is made.

The Progress Views will now be updated to reflect the form response and selected proficiencies.

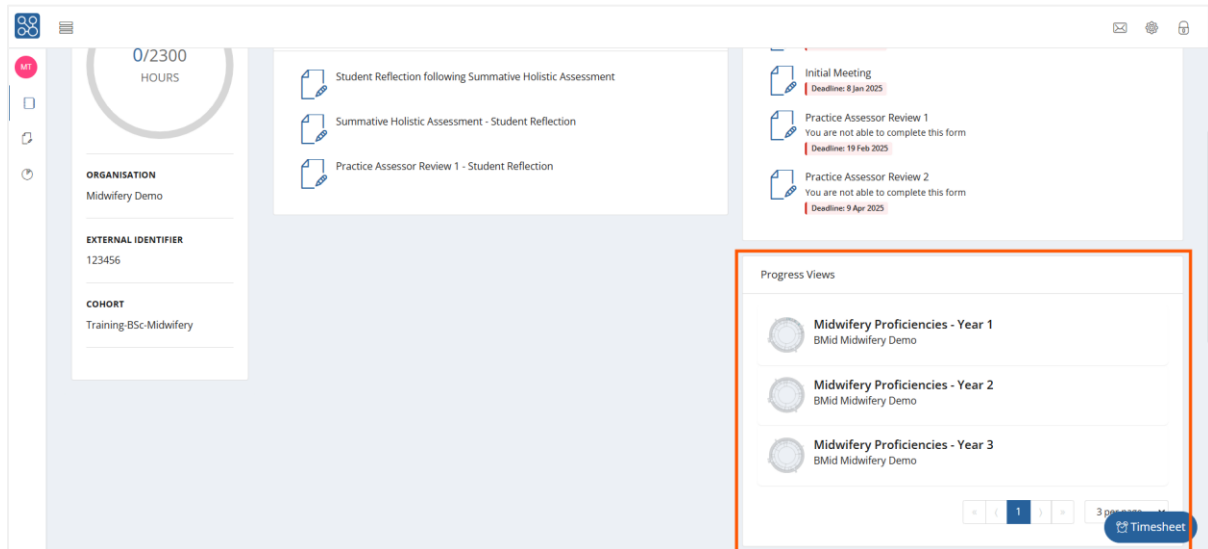

**Please see section 3.0 for more information.**

## 4.0 Viewing Progress Views

### 4.1 Navigation

Navigate the student's homepage by selecting their name from the dashboard.

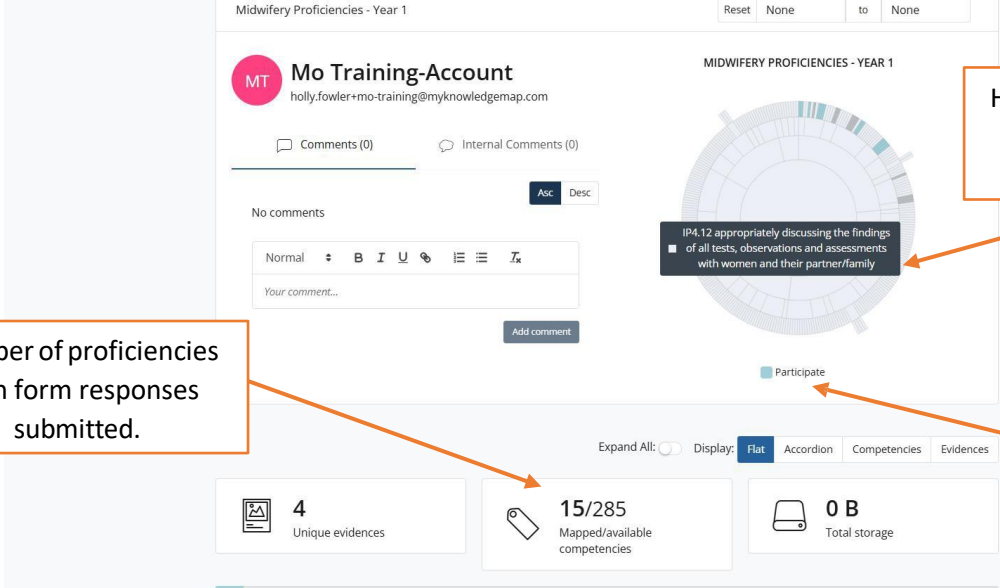

Scroll down to the Progress Views widget on the student homepage. You will need to select the correct framework depending on the year you wish to look at *e.g. Midwifery Proficiencies Year 1*.

## 4.2 Understanding Progress Views

The Progress Views wheel can be viewed here. Some points to note:

- Each segment of the wheel represents a proficiency or overarching section of proficiencies.
- A grey segment means a form has been added as evidence towards this proficiency.
- A coloured segment means this proficiency has been graded.
- The grading scheme is viewable below the wheel *e.g. participate* – you can hover over the grade to see what is required to achieve that grade.

The screenshot displays the 'Midwifery Proficiencies - Year 1' interface for a user named 'Mo Training-Account'. The central feature is a circular 'Progress Views wheel' with segments representing different proficiencies. A tooltip for the 'Participate' segment shows the requirement: 'IP4.12 appropriately discussing the findings of all tests, observations and assessments with women and their partner/family'. Below the wheel, three statistics are shown: '4 Unique evidences', '15/285 Mapped/available competencies', and '0 B Total storage'. The interface also includes a comments section and a 'Display' menu with options: Flat, Accordion, Competencies, and Evidences. The 'Expand All' toggle is currently off.

Number of proficiencies with form responses submitted.

Hover over a segment to view the proficiency in more detail.

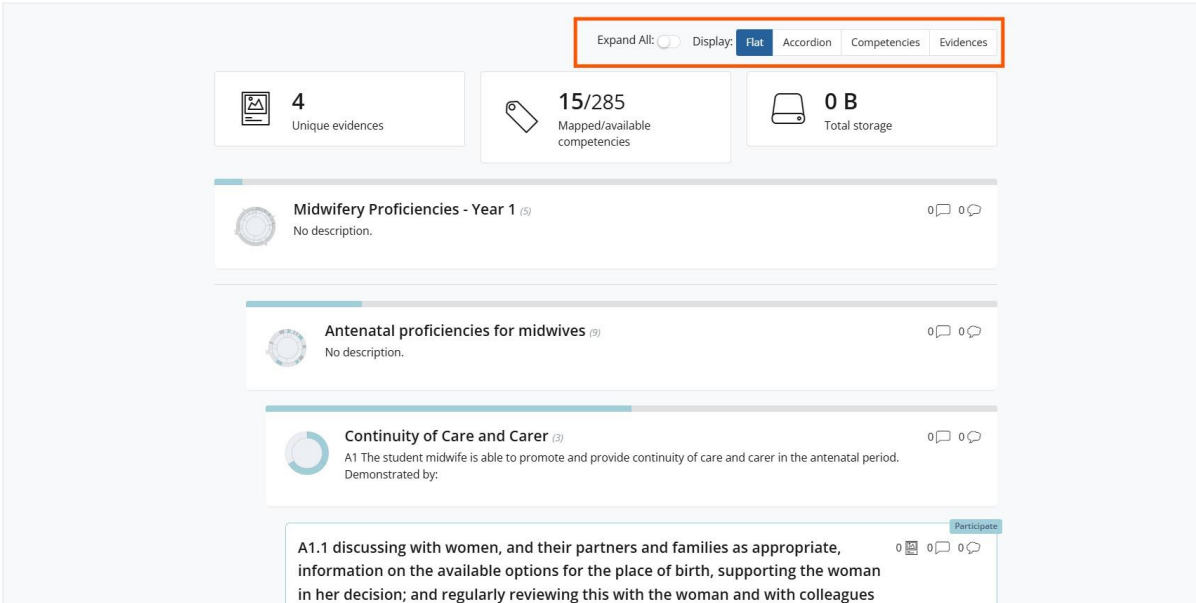

Hover over the grade/s underneath the wheel to see more information on how to achieve this grade.

## 4.3 Understanding display options

The framework and proficiencies can be displayed in a variety of ways by selecting the required display type:

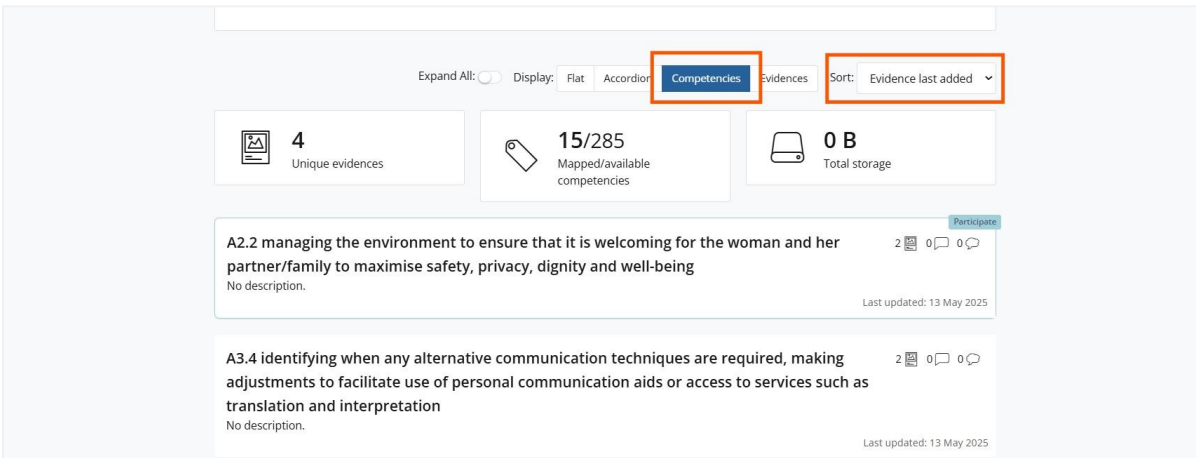

- **Flat** - Displays the relevant sections each proficiency comes under.
- **Accordion** – A condensed view displaying sections only.
- **Competencies** – A listed view displaying proficiencies only.
- **Evidences** – Displays form responses submitted in chronological order and the proficiencies they have been mapped towards.

**Expand All** can be toggled on for each of the display options to allow further details to be viewed.

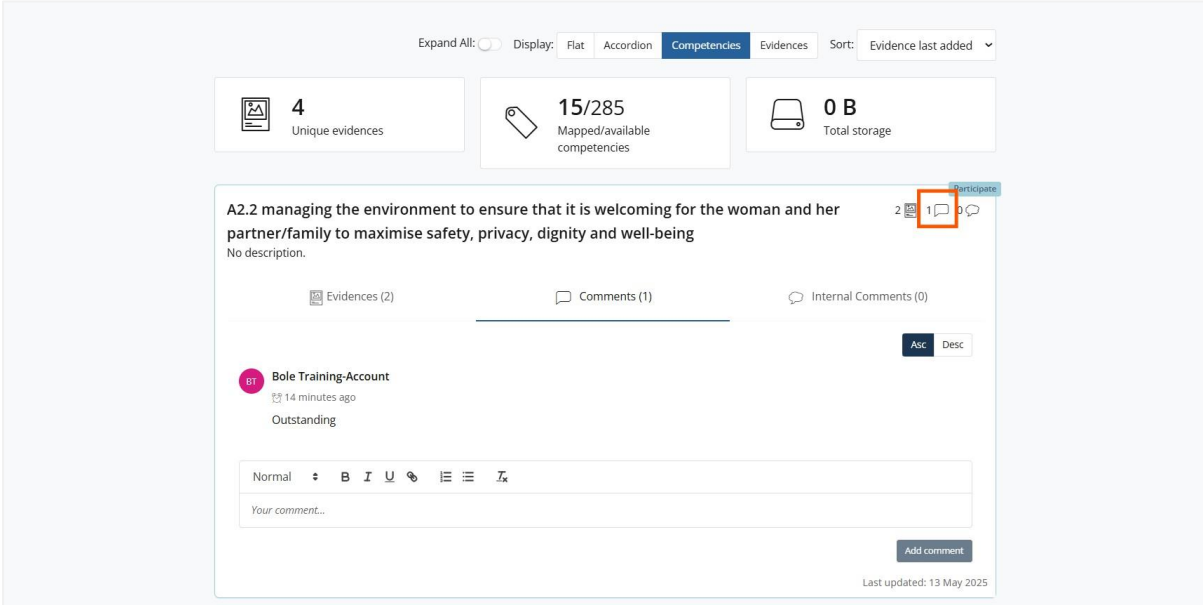

### Tip!

By selecting the display as **Competencies** and then sort by **evidence last added**, you will be able to see which proficiencies have had form responses recently mapped most recently.

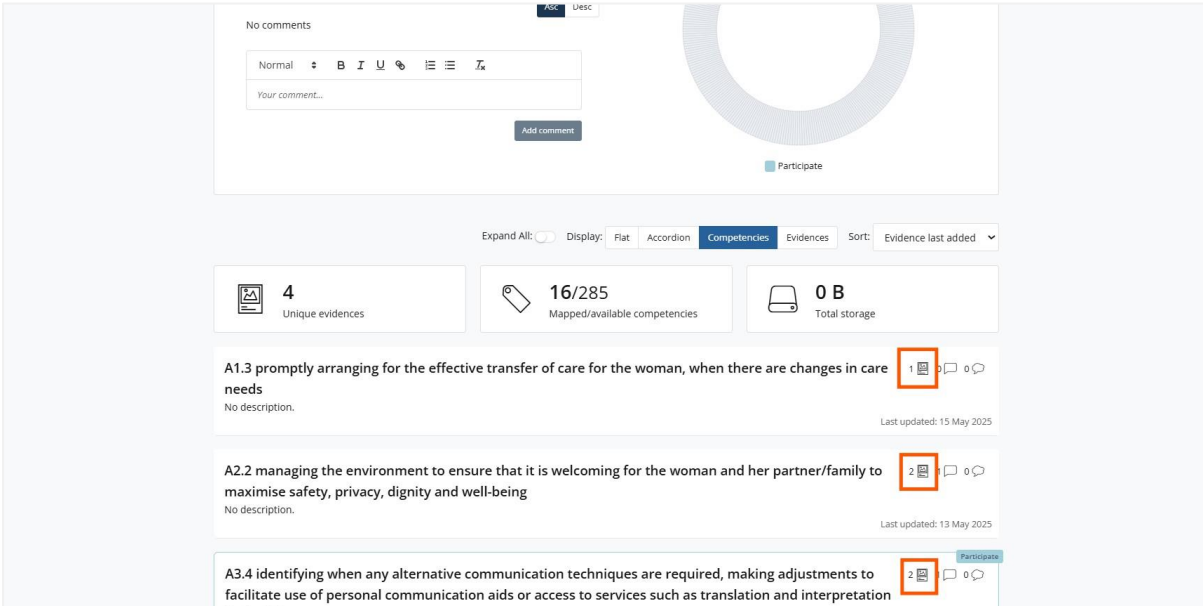

#### 4.3.1 Comments

There may be comments attached to the proficiency. To view comments, click the **speech bubble icon**.

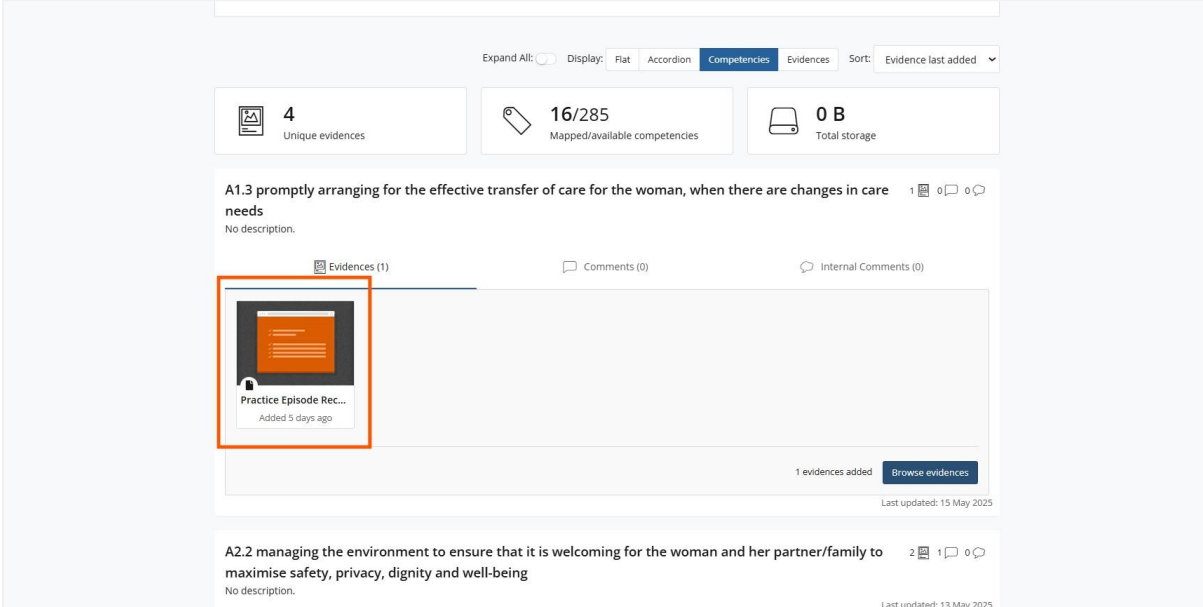

#### 4.3.2 Evidence

Any proficiencies that have evidence attached to them show within the evidence icon. The number of evidences (form responses) submitted towards this proficiency will show next to the evidence icon. Click the **evidence icon** to view the form responses.

Click the form response to view in more detail or to delete the evidence.

Expand All: ☐ Display: Flat Accordion **Competencies** Evidences Sort: Evidence last added

#### 4.4 Understanding grades

In addition to the segments on your Progress Views changing from grey (mapped but ungraded) to coloured (mapped and graded), grades and any comments can be viewed in more detail under each proficiency listed below the Progress Views wheel.

To view grades, ensure that you have selected the display option as either Flat or Competencies.

When a proficiency has been graded, it will appear highlighted in colour and show a tag with your grade.

## 5.0 End of Year Update

As a student gets to the end of a year, Administrators or Academics will need to ensure that the current years progress view is marked as complete to ensure that it can no longer be mapped against.

### STEP 1: Tutor / Administrator

- 1 - Log into MyProgress and locate the student via the dashboard;
- 2 - Click on their Progress View "wheel";
- 3 - Top right, click on the 3 dots and choose "Mark as Complete" - this will stop any future responses being mapped or any other changes from being made.
- 4 - Repeat for each student.

#### Video Guide:

<https://youtu.be/0D-Xvp9quS0>

**Note:** Within the response, once the framework is marked as complete, the past framework will still appear as a tab when completing any future forms, but it cannot be used to map the response.

### STEP 2: Administrator

The next step is to attach the next years framework to create the next Progress View "wheel".

- 1 - Navigate to the "Program Instances" and locate your instance;
- 3 - Click on the instance;
- 4 - Click "add template";
- 5 - Choose your template, select "ok" and then "save" top right to confirm.
- 6 - The new framework is enabled to use immediately by all users.

**Note:** Ensure you only add the framework once you are happy for students to begin using it. Adding it too early may risk responses being mapped against the framework when they shouldn't be.

#### Video Guide:

[https://youtu.be/DM1F\\_nBLIt4](https://youtu.be/DM1F_nBLIt4)

**Note for Academics:** To act as a reminder, we have added in an additional question within the Summary of Progress form to assist with reminding you of the **Step 1** process above.

The new question will look like this:

**Completion of Proficiencies**  
  
**Are all proficiencies complete?**  
  
☐ Yes, all required proficiencies are complete and I have marked the progress view wheel as complete  
  
☐ No, not all required proficiencies are complete and I haven't marked the progress view wheel as complete

If selecting 'yes', you will need to have either before or after completing this form, ensure that you have been into that student's progress view wheel and marked it as complete.

If selecting 'no', then no further action will need be taken on the progress view wheel and it will remain open and available to map form responses against. Of course, if a student then meets are requirements to pass the year at a later date, you will then select 'yes' when completing this form again and then follow the steps in section 5.0 to mark the progress view as complete.
